

A WORLD OF WATER

Water facts with Professor H₂O

Hi, my name is **Professor H₂O** and I am named after Hydrogen Oxide but you will know it as WATER! H₂O is the chemical formula for water and it means two hydrogen atoms and one oxygen atom.

Water is amazing! It is the only substance on earth that naturally occurs as a **solid**, a **liquid** and a **gas**!

70%

It also makes up a whopping 70% of our planet. But don't grab your cup and fill up – only 1% of that water is safe to drink.

Take our 60-second Quiz

Q What % of Earth is land?

.....

Q What % of Earth's water is not safe to drink?

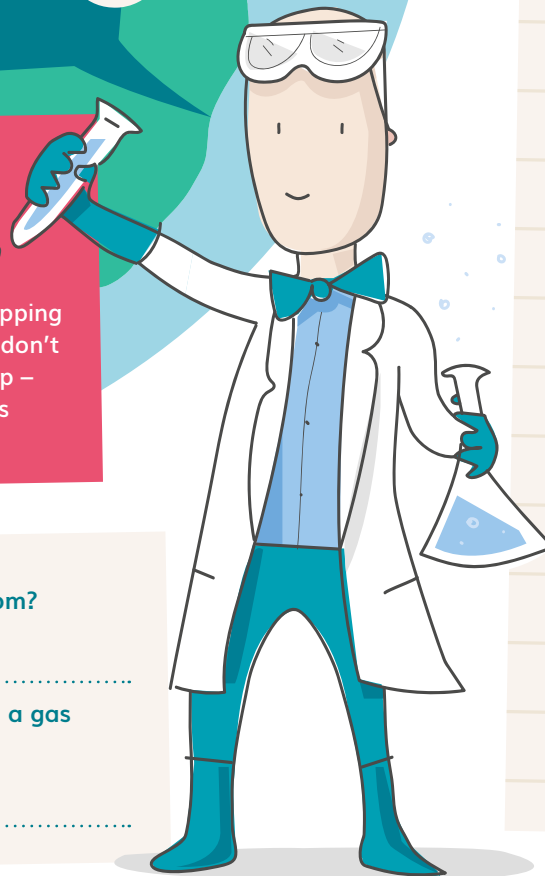

.....

Q What is an atom?

.....

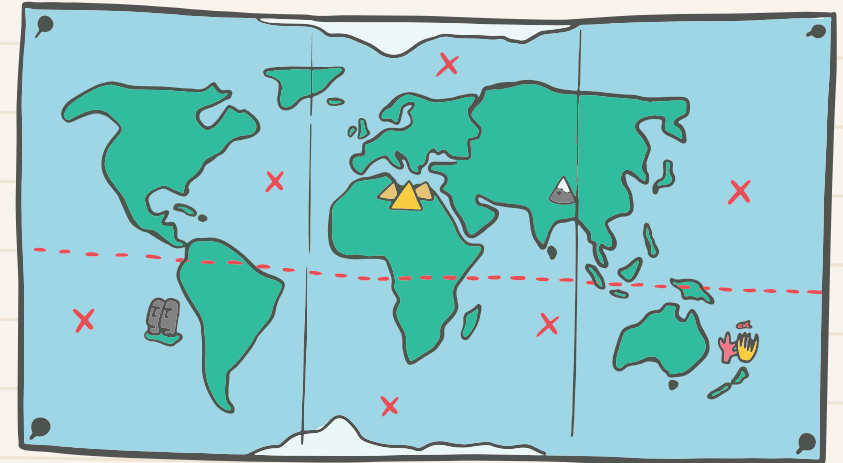

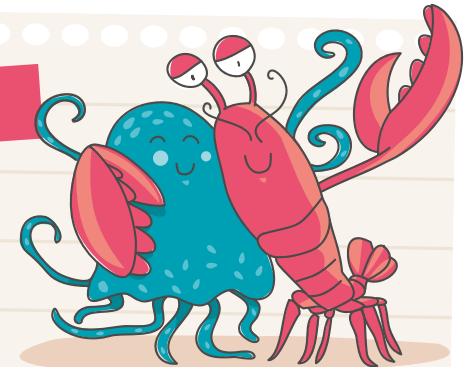

Q Name a liquid, a gas and a solid

.....

Squidge & Snap!

97% of our Earth's water is in the oceans and seas. Squidge and Snap have visited all these oceans...

Q Name the world's five largest oceans or seas...
