

# BUTTERFLY BUSTER!

There is a ravishing array of butterflies who call Chew Valley Lake home.  
How many can you find?

## DID YOU KNOW?

They see in ultraviolet colours, which are invisible to us!

Comma

Marbled White

Large white

Small Skipper

Speckled Wood

Red Admiral

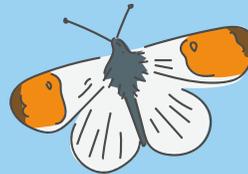

## DID YOU KNOW?

Butterflies taste with their feet!

Orange tip

Peacock

## DID YOU KNOW?

They only consume liquids!

## MIGRATING MARVELS!

We all know that birds migrate, flying off to different parts of the world to breed and feed, but were you aware that some butterflies do exactly the same?

One such frequent flyer is the attention-grabbing red admiral. This black-and-red beauty flutters up to the UK from North Africa and continental Europe, arriving in spring to feast of flowers and lay eggs on nettles.

Some are said to hibernate here during the winter but most make their way back to warmer climes late in the summer. You can spot them at Chew Valley in spring and summer.
